

**Amendments to the Claims:**

1. (Original) A method of displaying multiple images on a display system, said method comprising:

determining a size of an image display area;

selecting a first set of images from an image collection such that said first set of images will fit within said image display area along with a first specified minimum amount of space between images, an extra amount of space being generated by subtracting a width of said first set of images and said minimum amount of space from said size of said image display area; and

displaying said first set of images in a row by placing specified minimum amount of space between images and said extra amount of space divided evenly between said first set of images.

2. (Original) The method of displaying multiple images as claimed in claim 1 wherein said image collection comprises an ordered set of images.

3. (Original) The method of displaying multiple images as claimed in claim 1, said method further comprising:

placing a second specified minimum amount of space between subsequent rows.

10. (Canceled)

11. (Original) A computer-readable medium, said computer-readable medium comprising a set of instructions for displaying multiple images on a display system, said set of instructions performing the steps of:

determining a size of an image display area;

selecting a first set of images from an image collection such that said first set of images will fit within said image display area along with a first specified minimum amount of space between images, an extra amount of space being generated by subtracting a width of said first set of images and said minimum amount of space from said size of said image display area; and

displaying said first set of images in a row by placing specified minimum amount of space between images and said extra amount of space divided evenly between said first set of images.

12. (Original) The computer-readable medium as claimed in claim 11 wherein said image collection comprises an ordered set of images.

13. (Original) The computer-readable medium as claimed in claim 11 wherein said set of instructions further perform the steps of:

placing a second specified minimum amount of space between subsequent rows.
